

FINC Faculty Performance Review - 2024

Andrew Fieldhouse
Spring 2024 - Fall 2024

Instructions

Please review all the information below. When all sections have been confirmed, click "Submit For Review."

Teaching (Custom Section)

This information is auto-populated from a university data source and pulls the **main instructor of record only** (Fall 2009-present). *Student credit hours will now auto-load starting Spring 2023.* New courses will be uploaded on the 12th day of class each semester. Each course section is editable and faculty members who teach should verify their teaching information is correct. Faculty members can also add their "% Contributed to the Course" as well as a "Descriptive (if applicable)". Faculty members who are co-instructors can now add the courses they co-taught to this section including their percentage of effort in teaching the class. Faculty members can also indicate if a course has "Multidisciplinary Collaboration Activities" by choosing "Yes or No" as appropriate for this column.

If you have any questions, please contact us at faculty180@tamu.edu.

Teaching Input Section										Semester	Activity Classifications
Course Title	Course	Credit Hours	Lab Hours	Instruction Mode	Lecture Hours	Student Credit Hours	Enrollment	If co-taught, % contributed to course	Descriptive (if applicable)	Start Semester	Multidisciplinary Collaboration Activities Involved
MONEY & CAPTL MRKTS	FINC 381 502	3		TR	3	156	52			Fall 2024	
MONEY & CAPTL MRKTS	FINC 381 503	3		TR	3	150	50			Fall 2024	
MONEY & CAPTL MRKTS	FINC 381 504	3		TR	3	135	45			Fall 2024	
ANLY MONEY&CAP MARKET	FINC 642 602	3		TR	3	33	11			Fall 2024	
ANLY MONEY&CAP MARKET	FINC 642 603	3		TR	3	24	8			Fall 2024	
ANLY MONEY&CAP MARKET	FINC 642 604	3		TR	3	30	10			Fall 2024	

Student Evaluations Data

This information is pulled from a university data source on the 12th day of class of the following semester. *Note that AEFIS/HelioCampus data collection started Fall 2020.*

- Q1. What portion of the class preparation activities (e.g., readings, online modules, videos) and assignments did you complete?
- Q2. I understood what was expected of me.
- Q3. This course helped me learn concepts or skills as stated in course objectives/outcomes.
- Q4. I engaged in critical thinking and/or problem solving.
- Q5. Organization of this course.
- Q6. I learned to critically evaluate diverse ideas and perspectives.
- Q7. Feedback in this course helped me learn.
- Q8. The instructor fostered an effective learning environment.
- Q9. The instructor's teaching methods contributed to my learning.
- Q10. The instructor encouraged students to take responsibility for their own learning.

If you have any questions, please contact us at faculty180@tamu.edu.

Teaching Evaluation Supplemental Info

This section is where faculty can upload teaching evaluation documentation. Please check with your department/unit on what items to upload (e.g., student surveys, tables, charts, etc.).

If you have any questions, please email us at faculty180@tamu.edu.

Course Evaluation Data/Results	Semester
Description	Start Semester

▼ Additional Teaching Activities

Faculty members should enter any short courses, certificate programs, course development/innovation, continuing education, academic guest lectures, seminar speaking engagements, or workshops given, etc., that they were the instructor of and organized involving students. Leave this section blank if it does not apply to you.

If you have any questions, please email us at faculty180@tamu.edu.

Additional Teaching Activities									Semester	Activity Classifications				
Title	Audience	Location Instruction Delivered	Sponsoring Organization	Sponsoring Organization Location	Number of Participants	Description	Start Date	End Date	Start Semester	Method of Delivery	Non-Credit Instruction Type	Other Teaching Role	Student Collaborators	Teaching Innovation and Curriculum Development Type

▼ Publications, Conference Proceedings, Patents and Creative Products/Innovations

This section is for Publications, Conference Proceedings, Patents and Creative Products/Innovations. Faculty should review their publication information that was retrieved from Scholars@TAMU (*scholars.tamu.edu*) and uploaded into Interfolio. **Examples of Publications, Conference Proceedings, Patents and Creative Products/Innovations:** Artistic and Professional Performances, Artistic and Professional Productions, Books, Book Chapters, Case Studies, Conference Proceedings, Exhibitions, Journal Articles, Patent and Intellectual Property, Published Abstracts, Reviews, Technology, and Other Scholarly Work.

NOTE: There is a weekly feed for new items from Scholars@TAMU to Interfolio into this section. If you already have a Scholars@TAMU profile, that data (*e.g., books, book chapters, journal articles, conference proceedings, patents*) will automatically populate here from that account. This data feed is to help save your time and efforts to report your publication data. You will still have the ability to add new scholarly contributions as well as edit any pulled entries. Please be advised that if you manually enter something that will also be entered in Scholars@TAMU, it will appear as a duplicate entry – hence, we recommend checking your Scholars@TAMU profile for new entries first.

▼ Professional Development Activities

Faculty members are asked to provide any activities they have participated in for their own professional development or continuing education credits (e.g., teacher training courses taken, continuing education taken in subject matter taught, teaching improvement efforts, train the trainer courses taken, etc.). Leave this section blank if it does not apply to you.

If you have any questions, please contact us at atfaculty180@tamu.edu.

Professional Development Activities							Semester	
Course Title	CE/CPE/CEU/CLE Hours	Course Format	City	State	Description		Start Semester	End Semester

▼ Grants & Contracts

Please review your Grants & Contracts information. This information is auto-populated from Maestro. Internal TAMU awards are usually not entered in Maestro and will need to be entered manually. Travel Grants and other special grants/awards that come with monetary rewards can also be added in this section.

If you have any questions about this section, please email us at atfaculty180@tamu.edu.

Title	Sponsor	Award Date	Status	Term	Total Funding	Award / Proposal	Internal / External	Type of Funding	Type of Grant	Funded Status	% Effort Contributed	Research \$ attributed to faculty member	Grant/Contract Accompanying Comments
-------	---------	------------	--------	------	---------------	------------------	---------------------	-----------------	---------------	---------------	----------------------	--	--------------------------------------

▼ Faculty Mentoring (nonstudents)

Faculty members are asked to enter any formal faculty mentoring of other faculty members, postdoctoral researchers and/or visiting scholars in this section. Leave this section blank if it does not apply to you.

If you have any questions, please contact us at atfaculty180@tamu.edu.

Mentoring							Semester	
Mentee Name	Department	Mentee Position	Mentee Recognition				Start Semester	End Semester

▼ Professional Students/Interns/Residencies Advising

Faculty members are asked to enter any formal advising/mentoring of professional students, interns, or residents in this section. Leave this section blank if it does not apply to you.

If you have any questions, please contact us at atfaculty180@tamu.edu.

Professional Mentee Name	Department/Program	Professional Mentee Position	Description (if applicable)	Student Mentee Award	Student Mentee Placement	Start Semester	End Semester
--------------------------	--------------------	------------------------------	-----------------------------	----------------------	--------------------------	----------------	--------------

▼ Graduate Advising

Graduate student advising is auto-populated from a data feed from OGAPS/EIS. **Note that only those students who have filed a degree plan will show on this list.** Faculty should review their students to be sure they are listed correctly.

Note - if a current graduate student's information is incorrect, they should contact OGAPS to get it corrected.

Graduate Student Information											Semester	
Status	Student Name	External University/Department	Advising Type	Program	Degree	Major	Graduation/Expected Graduation Date	Thesis	Student Mentee Award	Student Mentee Placement	Start Semester	End Semester

▼ Undergraduate Advising

Faculty members are asked to enter numbers and information on undergraduate students advised or mentored in this section along with activity advised (e.g., undergraduate research, undergraduate teaching, honors, etc.). Leave this section blank if it does not apply to you.

If you have any questions, please email us at atfaculty180@tamu.edu.

Number of Undergraduate(s)	Activity Advised/Mentored	Undergraduate Name	Description	Student Mentee Award	Student Mentee Placement	Start Semester	End Semester
----------------------------	---------------------------	--------------------	-------------	----------------------	--------------------------	----------------	--------------

▼ Awards and Honors

This section is for faculty to record any award/honor they may have received. This can include honorary awards, teaching awards, department/college awards, alumni awards, and any national/international award. University level awards, grant awards, endowed positions, and memberships in societies should **NOT** appear here. Leave this section blank if it does not apply to you.

If you have any questions, please email us at faculty180@tamu.edu.

Year Conferred	Award and Honor Title	Conferring Organization	Award Classification	Award and Honor Level	Detailed Description of Award	Start Semester
----------------	-----------------------	-------------------------	----------------------	-----------------------	-------------------------------	----------------

▼ Service

Faculty should include any service activities in this section at the institutional (student organizations/department/college/university), professional/clinical, and community levels. This would include serving on committees, panels, boards, journals, etc.

If you have any questions, please contact us at faculty180@tamu.edu.

Committee Name/Activity	Organization	Service Type	Service Role	Regionality	Brief Description/Impact (if applicable)	Start Semester	End Semester	Multidisciplinary Collaboration Activities Involved
Referee	B.E. Journal of Macroeconomics	Professional	Reviewer	International	Peer review referee for papers submitted to the B.E. Journal of Macroeconomics	Fall 2015	Ongoing	No
Referee	The Economic Journal	Professional	Reviewer	International	Peer review referee for papers submitted to The Economic Journal	Fall 2017	Ongoing	No
Referee	Journal of Applied Econometrics	Professional	Reviewer	International	Peer review referee for papers submitted to the Journal of Applied Econometrics	Spring 2020	Ongoing	No
Referee	Journal of Money, Credit and Banking	Professional	Reviewer	International	Peer review referee for papers submitted to the Journal of Money, Credit and Banking	Fall 2020	Ongoing	No
PG&E Seminar Organizing Committee	Adam C. Sinn '00 Department of Finance	Department	Committee Member	Local	Helping to organize and coordinate the Adam C. Sinn '00 Department of Finance's weekly PG&E finance seminar series	Spring 2023	Ongoing	No
Referee	Economica	Professional	Reviewer	International	Peer review referee for papers submitted to Economica	Fall 2023	Ongoing	No
Referee	The Review of Economics and Statistics	Professional	Reviewer	International	Peer review referee for papers submitted to the Review of Economics and Statistics	Fall 2024	Ongoing	No

▼ Patient Care/Diagnostic Services

Leave this section blank if it does not apply to you. Faculty members should report any patient care/diagnostic services performed. The term “patient care” is defined here to mean all activities related to the diagnosis, prevention, treatment, and management of illnesses and diseases. This includes not only the direct management of the patient, but also the management of materials collected from patients.

If you have any questions, please contact us at faculty180@tamu.edu.

Type of Clinical Service	Reportable Activities and Accomplishments	Start Semester	End Semester
--------------------------	---	----------------	--------------

▼ Professional Affiliations and Memberships

Faculty members are asked to list any professional societies, organizations, or affiliations they are members of. Leave this section blank if it does not apply to you.

If you have any questions, email us at faculty180@tamu.edu.

Organization Name	Membership Status	Description	Start Semester	End Semester
American Economic Association	Member		Spring 2017	Ongoing
American Finance Association	Member		Fall 2022	Ongoing
American Real Estate and Urban Economics Association	Member		Spring 2023	Ongoing
Macro Finance Society	Member	"The mission of the Macro Finance Society is to advance and disseminate high-quality research in Macro Finance, which is a broad area at the intersection of financial economics and macroeconomics. The research conducted at The Society emphasizes microeconomic foundations via (dynamic) structural modeling, while being grounded in the data. Members of The Society consist of both financial economists and macroeconomists, who share the common goal of advancing and disseminating high-quality research in Macro Finance." https://macrofinancesociety.org	Fall 2023	Ongoing

▼ External Consulting

Faculty should list any external consulting activities in this section. Leave this section blank if it does not apply to you.

If you have any questions, please contact us at faculty180@tamu.edu.

Client Name	Estimated Hours Involved	Description	Start Semester	End Semester

▼ Teaching, Research and/or Other Scholarly or Creative Activities, and Service Impact Statement (Faculty Evaluation Review)

Faculty should write an impact statement on their teaching, research and/or other scholarly or creative activities in this section. Other parameters that can be included are h-index, etc.

Teaching, Research and/or Other Scholarly or Creative Activities, and Service Impact Statement	Semester
TRS / Creative Activities Statement	Start Semester

Research Impact

My AER R&R paper “The Returns to Government R&D: Evidence from Evidence from U.S. Appropriations Shocks,” is highly policy relevant and timely, and has already had a discernable impact in policy circles. Beyond conference and seminar talks, over the last 1 year I have given invited presentations of my paper for the National Academies Board on Science, Technology and Economic Policy, the Congressional Budget Office, NASA’s Office of Technology, Policy, and Strategy (at their Washington, DC headquarters), and the UK Department of Science, Innovation and Technology. I have given interviews about our paper and U.S. productivity and innovation that have been covered in Barron’s and two segments with the Texas Standard, and our headline results were recently cited in Treasury Secretary Janet Yellen’s official remarks at the Economic Club of New York—research impacts of mine all highlighted by the Texas A&M Research Bulletin. I will soon be presenting a shorter, more publicly accessible follow-up paper to our AER R&R paper for a more policy-oriented crowd and the press at the National Press Club in Washington, DC for the NBER Entrepreneurship and Innovation Policy and the Economy conference. Both papers are on the radar of Texas A&M Central Marketing and Communications, who are planning to work with me in pitching the former paper to media outlets and to coordinate a press push around the NBER conference at the National Press Club.

My paper “The Emergence of a Uniform Business Cycle in the United States: Evidence from New Claims-Based Unemployment Data”, recently published*Breakings Papers on Economic Activity*, was also launched on an unusually impactful stage. I presented our paper at the BPEA Spring 2024 conference to an esteemed audience of Nobel laureates (Ben Bernanke and George Akerlof), former CEA chairs (Greg Mankiw, Christina Romer, Jason Furman), former and current chief economists of the IMF (Ken Rogoff, Raghuram Rajan, Maurice Obstfeld, Pierre-Olivier Gourinchas), other distinguished economists and financial economists (Arvind Krishnamurthy, Thomas Philippon, Jeremy Stein, James Stock), and Washington press invitees. My coauthor, David Munro, and I also recorded an interview about our paper for an episode of Brookings Podcasts on Economic Activity, which aired on Spotify and Apple starting April 25, 2024. The paper centered on the construction of a novel panel dataset greatly expanding our scope for historical work with state-level unemployment data and should be impactful for researchers, hopefully generating many citations in coming years.

Teaching Impact

I have also had a positive impact on our students, excelling in my performance in teaching at Mays Business School. I taught three stacked sections of FINC 381/642: Money and Capital Markets in each of the Fall 2022, Fall 2023, and Fall 2024 semesters. My annual performance review letters for the last three years overwhelmingly characterized my teaching as ‘Excellent,’ and my course evaluations also reflect my knack for teaching, evidenced-based approach to pedagogy, and commitment to our students; across all sections in the last three years, students responded to ‘Overall, this was an effective instructor’ with an average score of 4.4 and median score of 5 out of 5 (5 being ‘Strongly agree’). Teaching has been an energizing and rewarding part of my academic career—here at Mays Business School, in my previous position as an Assistant Professor at Middlebury College, and while pursuing my doctorate at Cornell University—and I have consistently been recognized as an effective teacher.

COVID-19 Impact Statement (Faculty Evaluation Review)

This area is where faculty can enter what impact has COVID-19 had on your teaching, research/creative activities, and service, job responsibilities or professional opportunities?

What impact has COVID-19 had on your teaching, research/creative activities, and service, job responsibilities or professional opportunities?

Start Semester

Goals (Faculty Evaluation Review)

Faculty should denote progress made on goals for the previous year and enter new goals for the upcoming year with regard to teaching, service, and research/creative activities as relevant to assigned faculty title and expected duties. Goals will be reviewed with your Department Head during your annual review.

If you have any questions, please contact us atfaculty180@tamu.edu.

Goals	Semester
Please list what your goals were for the previous year and what your planned goals are for the upcoming year.	Start SemesterEnd Semester
Recent and immediate research goals	
My primary research goal for 2024 was trying to get my paper “The Returns to Government R&D: Evidence from Evidence from U.S. Appropriations Shocks,” joint with Karel Mertens, closer to being published in a top-five Economics journal. It has been a productive year on this front: I submitted our paper to the American Economic Review in December 2023; we received an R&R from the AER in May 2024; we resubmitted a revised draft in November 2024; and we just received a second-round R&R in March 2025. While a conditional acceptance would have been unquestionably preferable (but unusual for top-five journals after a single round of revisions), the second round referee reports are shorter and seem even more manageable than the first, and I believe our editor, Emi Nakamura, would really like to see our paper published there. My top research goal for the upcoming year is to convert the paper for publication at the AER as quickly as possible. We aim to resubmit our revised manuscript in June or by early July at the latest. If we get a rejection with this next round, we will quickly resubmit to another top-five Economics journal, likely the Quarterly Journal of Economics. My secondary research goal for 2024 was to get my older joint paper “The Emergence of a Uniform Business Cycle in the United States: Evidence from New Claims-Based Unemployment Data” across the finish line and published in Brookings Papers on Economic Activity, which we did. BPEA was a good home for this particular paper. I presented our paper to an esteemed audience in Washington, DC at the BPEA Spring 2024 conference, and I now have a standing invitation to Brookings’ semi-annual invite-only conferences, which are a networking and professional gold mine (see Impact Statement); I will be attending the Spring 2025 conference in person. A major contribution of this paper was a building new historical dataset on state-level unemployment rates that substantially expands the time horizon for panel data work across U.S. states (I built this dataset while still at Middlebury College, with my former colleague and coauthor David Munro, before my research incentives shifted); the dataset should be quite useful to a lot of researchers and will hopefully generate a lot of citations. Dovetailing with getting these older “legacy” papers published, both of which had been started years before joining Texas A&M, another top goal of 2024 was accelerating my pivot from empirical macro toward more empirical finance projects targeting top Finance journals and making progress on new collaborations with colleagues in the Adam C. Sinn ’00 Department of Finance. I have made substantial progress on this goal in 2024, particularly on two fronts: Writing a new paper, “What do Macroeconomic Shocks Teach Us About Cross-sectional Stock Returns?” with Hagen Kim and Arvind Mahajan, and trying to gain access to restricted-use U.S. Census Bureau microdata for a series of papers with Adam Kolasinski. I describe recent progress and upcoming goals for both projects, in turn, below. I started a new research project with Hagen and Arvind in late 2023, and we made considerable progress on our joint paper in 2024. Drawing on our complementary areas of expertise, we aim to study whether existing empirical macro shocks are predictive of and can help explain prominent anomalies in stock returns, potentially addressing omitted variable bias in the literature on cross-sectional stock returns. For our project, I compiled a comprehensive dataset of previously identified macroeconomic shocks from the related literature (to which I have contributed and know quite well), manually adapting many of these shock series to the monthly frequency necessary for our work with stock returns. Specifically, we study the explanatory power of various state-of-the-art credit shocks (Gilchrist and Zakrajšek 2012; Fieldhouse and Mertens 2017), monetary shocks (Bauer and Swanson 2023; Aruoba and Drechsel 2024), tax shocks (Mertens and Ravn 2012, 2013), defense spending news shocks (Ramey and Zubairy 2018), R&D/TFP news shocks (Fieldhouse and Mertens 2023), oil shocks (Kanzig 2021), and uncertainty shocks (Bloom 2009), among others. We find that almost all of these macroeconomic shocks have significant predictive power for the cash flow news and/or discount rate news components of disaggregated market returns, following and extending the approach of Campbell and Vuolteenaho (2004). The shocks also have and/or significant, heterogenous predictive power for a wide range of prominent anomaly returns from the related literature, as well as industry-specific returns, and we explore forecast error variance decompositions of these macroeconomic shocks. Our data work has been completed, our empirical analysis is largely finalized, and our joint paper is nearly done being drafted. I will be presenting our work in the brownbag series in Spring 2025, and we aim to submit to the Journal of Finance later this year. Finishing this paper and getting it under review is a top research goal for 2025. Another primary research goal for 2024 was to finalize and submit a Census Bureau project proposal (joint with Adam) requesting access to restricted-use microdata data from the various Census Research and Development Surveys (RADS) to study the effects of federally funded R&D on firms (and their competitors) conducting contract R&D. Our Census project proposal hinges on using firm-level data from the RADS surveys because they identify contract R&D funded by specific federal agencies, allowing us to link the Fieldhouse and Mertens (2023) agency-level instrumental variables to recipient firms in the RADS dataset, using prior receipt of federal R&D contracts from the same major agencies as a measure of exposure for the treatment group. We proposed using the firm-level RADS data interacted with the Fieldhouse and Mertens (2023) instruments to write three papers on the relationship between federally funded contract R&D and the for-profit corporations performing this R&D work: Our first paper seeks to quantify the degree to which there is a causal effect of federal contract R&D on investments in R&D funded by for-profit corporations, separately identifying direct effects from receipt of federal R&D contracts, spillovers from contract R&D performed by industry-group peers, spillovers from contract R&D performed by firms in other industries, and other broader spillover effects. Our second paper seeks to quantify how exogenous shocks to R&D appropriations for major funding agencies affect the future sales growth and profitability of recipient firms relative to industry-group, and test whether internal benefits or spillovers to industry peer rivals dominate in terms of market share. Our third paper will study how exogenous shocks to federal R&D appropriations impact the stock prices of firms with R&D contracts, and the degree to which abnormally high stock returns for R&D intensive firms reflect mispricing or compensation for unknown risk factors. We submitted our project proposal and data request to the U.S. Census Bureau in Spring 2024; we received preliminary approval from the Census Bureau in Fall 2024; we submitted the necessary follow-up request to the IRS in Fall 2024 (I believe we are still waiting for final approval from the IRS); I submitted my Special Sworn Status application in Spring 2025; and we are hoping for imminent final approval to start data work on this project at Texas RDC (though a possible government shutdown may delay the start date). Beyond my firm-level empirical corporate finance and asset pricing work with Adam, Karel Mertens and I are also planning to begin working on a related industry-level paper studying productivity stock return responses to the Fieldhouse and Mertens (2023) exogenous R&D appropriations shocks. This paper will try to tease apart direct vs. indirect spillover effects on industry-level productivity and excess stock returns from our instrumental variables for changes in federal R&D appropriations for five major R&D agencies, building from the framework of Chaudhry, Rajch, Sebati, Kellon, and Mirtene (2024) for the aggregation of data through networks. In our contract, the data	

R&D agencies, building from the framework of Chodorow-Reich, Gabaix, Koijen, and Viviano (2024) for the propagation of shocks through networks. In our context, shocks to NASA R&D appropriations should directly affect the aerospace industry but not the pharmaceutical industry, and vice versa for shocks to NIH R&D appropriations, but we should also be able to disentangle direct vs. indirect spillovers with this methodology. We will also try to develop a second granular (tax policy) instrument for private R&D capital to simultaneously estimate industry-level and aggregate returns to both federally funded and privately funded R&D. Work on this paper will only begin after resubmitting our AER R&R, hopefully later this year; I view this as a relatively low-hanging fruit with important policy implications, and I want to write the paper before someone else uses my (now public) instrumental variables to scoop us. Moreover, Chad Jones (Stanford) requested that we write a version of such a follow-up paper and submit it to Econometrica, a suggestion from an editor clearly worth pursuing as quickly as possible.

Another research goal for 2024 was to resume work on my existing paper “Crowd-Out Effects of Housing Credit Policy” and submit it the Review of Financial Studies, which ended up being put on the backburner while getting “The Returns to Government R&D: Evidence from Evidence from U.S. Appropriations Shocks” resubmitted to the AER, trying to accelerate my pivot toward new finance collaborations with colleagues in the department, and getting “The Emergence of a Uniform Business Cycle in the United States: Evidence from New Claims-Based Unemployment Data” across the finish line at BPEA. Another top research priority for 2025 is updating this older paper and getting it to the RFS.

Broader research and professional goals

My top professional goal for 2024 was converting my current Visiting Assistant Professor position to a tenure-track Assistant Professor position with the Adam C. Sinn ‘00 Department of Finance during the 2024-2025 recruiting cycles. I was thrilled to have achieved this goal, with the help from Department Head Jamie Brown and the support of my other research faculty colleagues, in November 2024. I have been very happy in this department and am confident this will continue to be an excellent and productive research environment for my career; I genuinely like my colleagues in the department, I have synergistic research interests with numerous colleagues, I have several collaborations in the works with colleagues that I view as quite promising, and I have plenty of research support here. Moreover, my wife, Heidi Vanden Brink, is happy and quite productive as a tenure-track Assistant Professor in the Department of Nutrition at Texas A&M University; we are thrilled to both be staying here as assistant professors. With my conversion to a tenure-track position in September 2025, the next overarching professional objective is being promoted to the rank of Associate Professor of Finance with tenure within the next four- to six-years. Toward this end, I aim to publish at least one more paper in a top-five Econ journal (I am optimistic that “The Returns to Government R&D: Evidence from Evidence from U.S. Appropriations Shocks” will be accepted at the AER in the next year, discussed above) and at least two to three papers in top-three Finance journals. I am continuing to pivot toward more research targeting top Finance journals, as is hopefully evidenced by my joint paper with Hagen and Arvind and my Census research project with Adam (discussed above).

Looking forward, I also hope to become a Faculty Research Fellow (and eventually a Research Associate) of the National Bureau of Economic Research (NBER) and regularly attend the NBER Summer Institute (SI) to increase my professional visibility, keep abreast of top-tier research in progress, network with journal editors, and broaden my network of coauthors. Last year, I helped advance this goal by presenting my paper “The Returns to Government R&D: Evidence from Evidence from U.S. Appropriations Shocks” for the NBER SI Innovation program in July 2024. Following my presentation, Ben Jones (Kellogg School of Management) and Josh Lerner (Harvard Business School) requested that Karel and I write a follow-up paper for their upcoming NBER Entrepreneurship and Innovation Policy and the Economy conference, an invite-only conference chapter on the returns to publicly funded R&D. I started producing this paper in Fall 2024; I submitted a first draft to our editors in Spring 2025; I will be presenting the final draft at their conference at the National Press Club, Washington, DC on April 29, 2025; and the final version of the paper will be published in their conference volume in the Summer of 2025 (NBER Entrepreneurship and Innovation Policy, Volume 5). Josh is a co-director of the NBER’s Productivity, Innovation, and Entrepreneurship program and Josh and Ben had co-organized the NBER SI Innovation program last summer (along with Heidi Williams, Dartmouth). At Heidi’s invitation, I also gave a brownbag on our AER R&R paper for the Congressional Budget Office in May 2024. I am hoping that these presentations and our NBER conference chapter help lead to an invitation to join the NBER as a Research Fellow, which would be immensely valuable for my academic career. In a similar vein, I was admitted into the Macro Finance Society in 2023 and look forward to participating in that research community in the years to come; I plan to submit my new paper “What do Macroeconomic Shocks Teach Us About Cross-sectional Stock Returns?” (with Hagen and Arvind) for the society’s next call for papers, and hope to leverage it for greater visibility and networking with this group.

Teaching and mentorship goals

I will again be teaching three sections of FINC 381/642: Money and Capital Markets in the Fall 2025 semester, after preparing and teaching the class for the first time during the Fall 2022 semester and then refining and polishing my version of the course during Fall 2023 and Fall 2024. I am satisfied with my teaching evaluations (see Impact Statement for details) and look forward to an even easier semester of teaching and relatively more time for research next fall, now having this course prep thoroughly under my belt. I really enjoy teaching Money and Capital Markets and sincerely appreciate only having this one course prep for the past three years (thank you, Christa Bouwman) and the next six years or so (thank you, Jamie).

Mentorship is something that I deeply value and take seriously; I’ve benefited immensely from fantastic mentors throughout my career and hope to pay that forward to our doctoral students. In that vein, I have enjoyed informally advising some of our PhD students, particularly Yuan Zhou, Yujie Ruan, Toshi Fukui, Mansoor Shekarian, and various other students participating in the Finance PhD-Junior Faculty Research Discussion Group that Tristan Fitzgerald has been kindly organizing. I have also valued the opportunity to work with Xiaan Zhou, Haneul Yi, and Grace Kim in supporting work on my cross-sectional stock returns paper with Hagen Kim and Arvind Mahajan. I would like to be working with and formally advising more PhD students in the next few years, and recently agreed to join as the external member for the committees of several students in the Economics Department (Vladislav Abramov and Jorge Hirs Garzon). I look forward to eventually serving on dissertation committees for some of our Finance PhD students, and will try to continue serving as an informal mentor, advisor, and sounding board for our graduate students in the meantime. It should go without saying that I will also continue to attend PhD students’ brownbag workshops and practice job talks, participate in mock interviews, serve as a faculty mentor for the pre-seminar discussions, and help with the PhD admissions process.

Fall 2024

Ongoing

▼ Mandatory Training (Faculty Evaluation Review) - SECTION MUST BE COMPLETED

THIS IS A REQUIRED SECTION TO BE COMPLETED! Also be sure to enter a Semester for your review year (if for calendar year 2023 - be sure to put a semester within that year - e.g., Spring 2023, Summer 2023 or Fall 2023) so it will show up for 2023. If you put Spring 2024, it will not show up under 2023 evaluation.

Texas A&M System Regulation 33.05.02 requires Texas A&M System employees to have completed and be current on all mandatory training in order to receive a satisfactory annual review. Faculty members must certify below that all mandatory training is current and no outstanding training is pending. Faculty members must also certify they have no outstanding items in Concur, Time & Effort or Aggie Buy.

If you have any questions, please contact us at faculty180@tamu.edu.

I certify my mandatory training is current and no outstanding training is pending	I certify that I have no past due, outstanding or pending Concur items	I certify that I have no past due, outstanding or pending Aggie Buy contracts	I certify that I have no past due outstanding or pending Time and Effort items	Start Semester	End Semester
Yes	Yes	Yes	Yes	Spring 2024	Fall 2024

▼ Safety (Faculty Evaluation Review) - SECTION MUST BE COMPLETED

THIS IS A REQUIRED SECTION TO BE COMPLETED! Also be sure to enter a Semester for your review year (if for calendar year 2023 - be sure to put a semester within that year - e.g., Spring 2023, Summer 2023 or Fall 2023) so it will show up for 2023. If you put semester (e.g., Spring 2024), it will not show up under 2023 evaluation.

All employees have the responsibility to assure compliance with University and EHS safety policies and procedures, as well as promote sound work practices and good housekeeping, develop safe work habits, be familiar with hazards present in their work area, follow all procedures and rules, and to contact their supervisor whenever a potential hazard is recognized.

To report a safety hazard, please contact Environmental Health and Safety at ehsd@tamu.edu or call 979-845-2132 with the following information: 1) Location of concern (building and room number, parking lot/street location, etc.) and 2) Short description of the concern.

Safety concerns can also be reported in the Origami Portal. Follow the instructions [here](#) to report a new incident, but select “Safety Concern” at the bottom of the page when asked what applies to the incident.

If you have any questions, please contact us at faculty180@tamu.edu.

I certify that I am in compliance with all University/EHS safety requirements.	Start Semester	End Semester
Yes	Spring 2024	Fall 2024

▼ Department/Unit specific requirements (Faculty Evaluation Review)

This area is for departments/units to be able to request additional materials for faculty reviews.
