

SCHOLARLY ACTIVITIES FOR CLINICAL FACULTY (10% RESEARCH EXPECTATIONS)

This following list outlines a range of scholarly activities suitable for non-tenure track faculty to fulfill a 10% research expectation for their annual appointments. These activities encompass traditional academic pursuits as well as applied research, industry collaborations, and public scholarship. The list is designed to recognize the unique contributions of clinical faculty while maintaining high standards of academic rigor and relevance. It provides flexibility for faculty to engage in scholarship that aligns with their expertise, teaching responsibilities, and departmental goals.

1. Publications and Academic Writing

- Peer-reviewed publications in journals of appropriate quality
- Authorship or co-authorship of books or book chapters published by academic presses
- Creation of peer-reviewed case studies published in reputable academic or teaching-oriented journals
- Authoring textbooks, educational guides, or other instructional materials adopted for academic courses or professional education programs
- Writing white papers, policy briefs, or technical reports

2. Applied Research and Industry Collaboration

- Conducting applied research projects that apply academic theories to solve real-world business problems
- Collaborating with industry partners on research projects leading to documented outcomes
- Developing innovative teaching methodologies based on research
- Creating and sharing open educational resources (OERs)

3. Departmental and Institutional Research Activities

- Participation in departmental research workshops
- Presenting research findings at faculty colloquia or seminars
- Organizing internal research symposia or workshops
- Mentoring student research projects or honors theses

4. External Conference and Academic Event Participation

- Presenting at academic conferences related to the faculty member's field of teaching
- Organizing or chairing academic conferences or symposia
- Invited presentations at external academic or industry events
- Serving as a discussant or panelist at academic conferences

5. Editorial and Peer Review Activities

- Relevant, active editorships with academic journals or other business publications
- Service on editorial boards for academic journals
- Service as an ad hoc reviewer for academic journals
- Participation in accreditation or peer review processes (e.g., AACSB reviews, institutional assessments)

6. Professional Leadership and Recognition

- Academic leadership positions in recognized academic societies and associations
- Significant participation in academic associations or professional standard-setting bodies
- Research awards or academic fellow status

- Mentoring student research projects or honors theses

7. Grant and Funding Activities

- Receipt of significant externally funded research grants
- Collaborating on interdisciplinary research projects with funding components

8. Public Scholarship and Thought Leadership

- Engaging in public scholarship through articles or op-eds in well-regarded business magazines, newspapers, or online platforms
- Developing and disseminating policy-oriented research or analysis
